

The Green Pilgrims

On 2nd February 2016 we (Gabriele and Sesto Giovanni Castagnoli) started out on a pilgrimage – one with no time limit after we gave away all our possessions, except the contents of our two rucksacks.

There's no *single* motivation for what we're doing. Each of us has his own motives, aspirations and visions. What binds us, however, is our belief in the common sense of this new stage in our joint life journey.

The name we have chosen – "the green pilgrims" – fits to the manifold topics we want to move and stand for.

Green Thoughts

We want to meet people to swap ideas and inspire each other. In the most simple form we do this under the title: „Green Thoughts“. An exchange of one to two hours with some or a number of interested people.

After some initial thoughts and/or episodes of our pilgrimage together we question some of the following topics or other issues that might come up in open dialogue:

- life's journey, pilgrimage, migration ...
- or
- (freedom of) fear, Courage, social commitment
- cooperatives, alternative money systems, possessions
- cosmos, man, culture
- work life or life's work ...

Another Offer

The „Green Thoughts“ can be the first step of following workshops. With those a group of people is able to bring that what is playing on their minds co-creatively into practice in ones every day life.

The outcome: new thoughts > new ways to act > vivid, responsible people in exactly the same society (culture)
